

# Introduction to MATLAB

Bonita Vormawor - Senior Application Engineer

Louvere Walker-Hannon - Senior Application Engineer

## What are your requirements?

- Could your work benefit from using built-in mathematical functions fundamental to solving engineering and scientific problems?
- Are you interested in using an interactive environment ideal for iterative exploration, design, and problem solving to help you work more effectively?
- Do you have questions about how you can quickly explore ideas, gain insight into your data, and document and share your results?
- Are you looking for ways to enhance your workflow through re-use and automation?

# Discover answers to these and other questions...

## Session Highlights:

1. Access and Review the Data
2. Import the Data
3. Visualize and Explore the Data
4. Determine Amount of Data to be Used for Analysis
5. Implement Analysis of Data
  - Working with Data from Multiple Files
6. View a Report of the Analysis
7. Next Steps - Available Resources

## Next Steps – Getting Started with MATLAB

- Review the “fromData2insights.pdf” file for detailed demo results
- Use the “fromData2insightsDemo.mlx” in MATLAB to run the demo code
- Learn more about MATLAB:
  - <https://www.mathworks.com/products/matlab/getting-started.html>

# Available Self-Paced Training Courses

# MATLAB Fundamentals and Beyond

## MATLAB Fundamentals

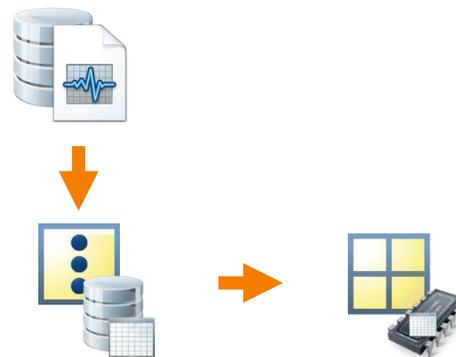

### MATLAB for Data Processing and Visualization (1 Day)

- Import data, process data
- Customize visualizations
- Work with irregular data

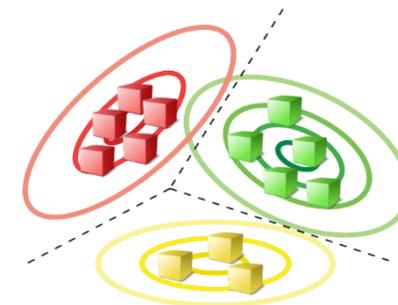

### Processing Big Data with MATLAB (1 Day)

- Creating datastores
- Manipulating big data
- Working with clusters

### Machine Learning with MATLAB (2 Days)

- Discover natural patterns
- Create predictive models
- Improve models

# Upcoming Training Schedule

- **MATLAB Fundamentals**
  - Oct 6-8 (EDT)
  - Oct 13-15 (EDT Spanish)
  - Oct 20-22 (PDT)
- **MATLAB for Data Processing and Visualization**
  - Nov 18 (EDT)
- **Machine Learning with MATLAB**
  - Sep 22-23 (PDT)
  - Nov 12-13 (EDT)
  - Oct 20-22 (PDT)
- **Processing Big Data with MATLAB**
  - Nov 17 (PDT)

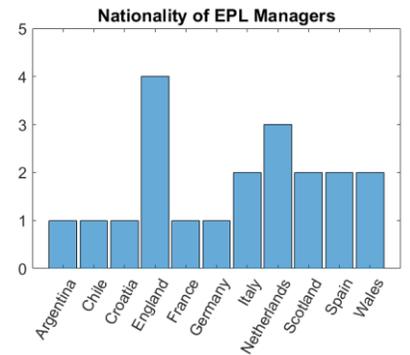

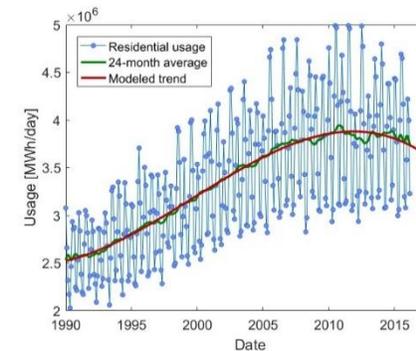

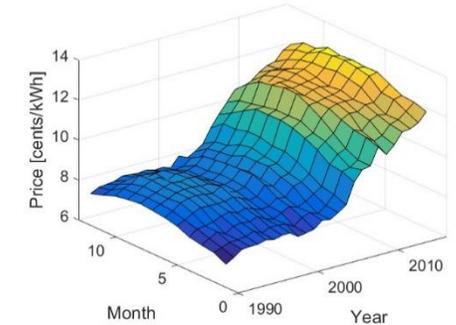

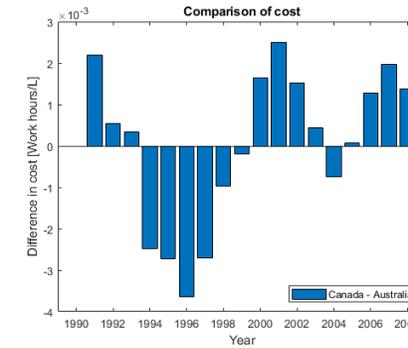

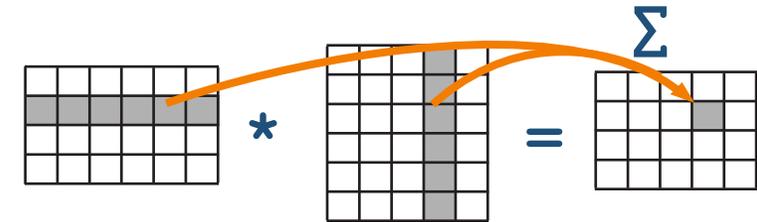

[Find out more about training schedule](#)

# MATLAB Fundamentals

After this 3-day course you will be able to:

- Import, analyze, and export data
- Write programs to automate complex tasks
- Perform calculations and data analysis with vectors and matrices
- Create informative data visualizations

[See detailed course outline](#)

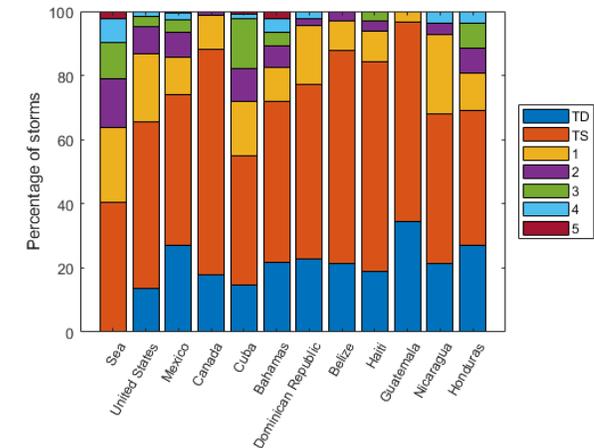

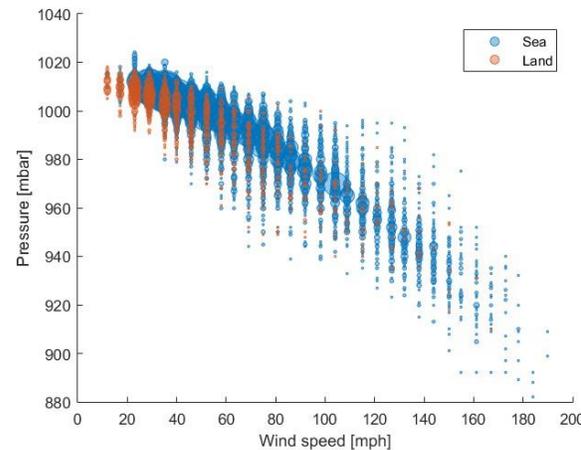

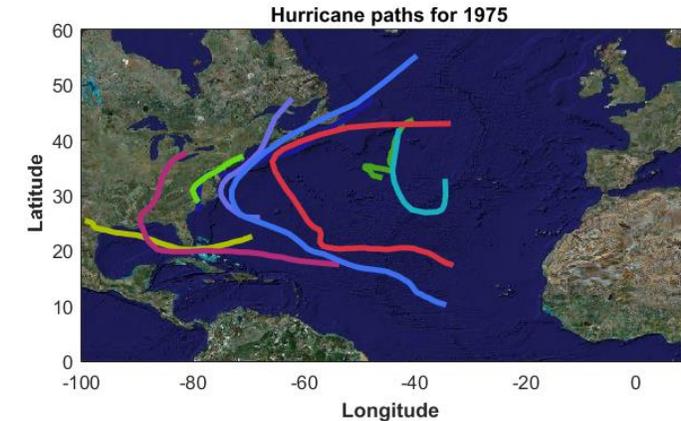

# MATLAB for Data Processing and Visualization

After this 1-day course you will be able to:

- Import data
- Process data
- Customize visualizations
- Work with irregular data

[See detailed course outline](#)

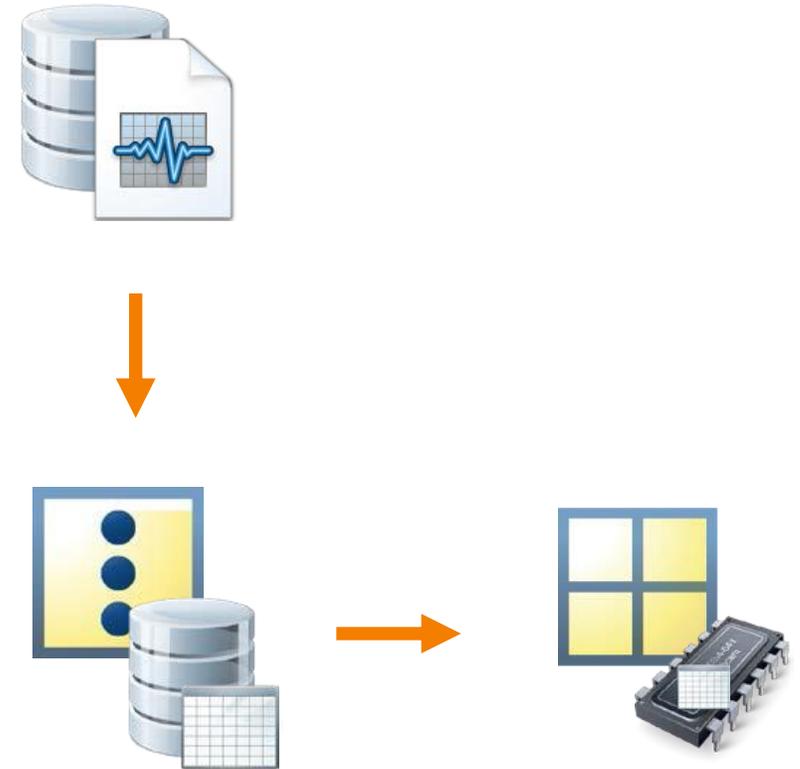

# Processing Big Data with MATLAB

Topics included in this 1-day course:

- Creating datastores
- Manipulating big data using tall arrays
- Importing custom data formats
- Applying custom functions to tall arrays
- Working with clusters and cloud environments

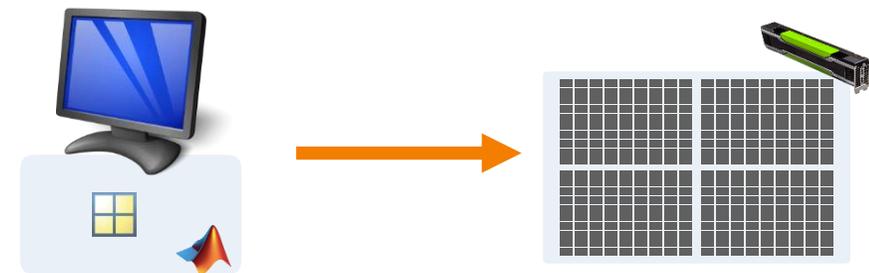

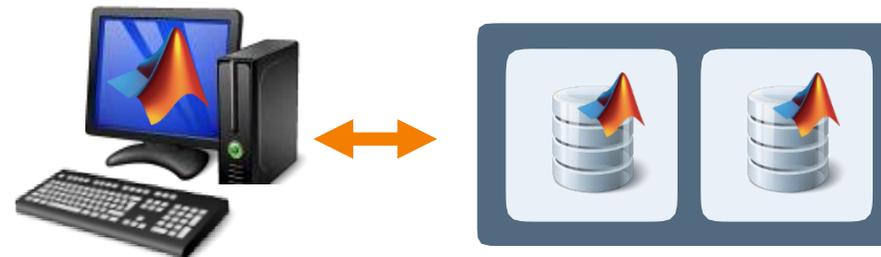

[See detailed course outline](#)

# Accelerating and Parallelizing MATLAB Code

Topics included in this 2-day course:

- Improving performance of MATLAB code
- Generating MEX-files
- Parallelizing computations
- Offloading execution
- Working with clusters
- GPU computing

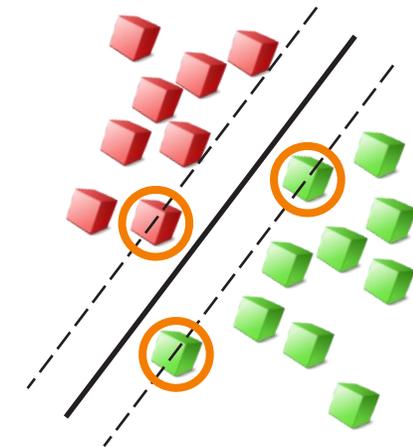

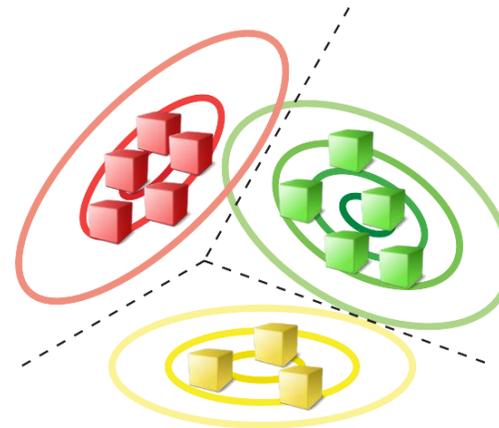

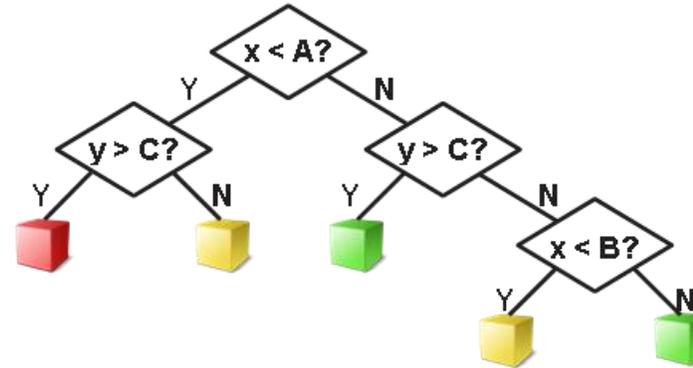

[See detailed course outline](#)

# Machine Learning with MATLAB

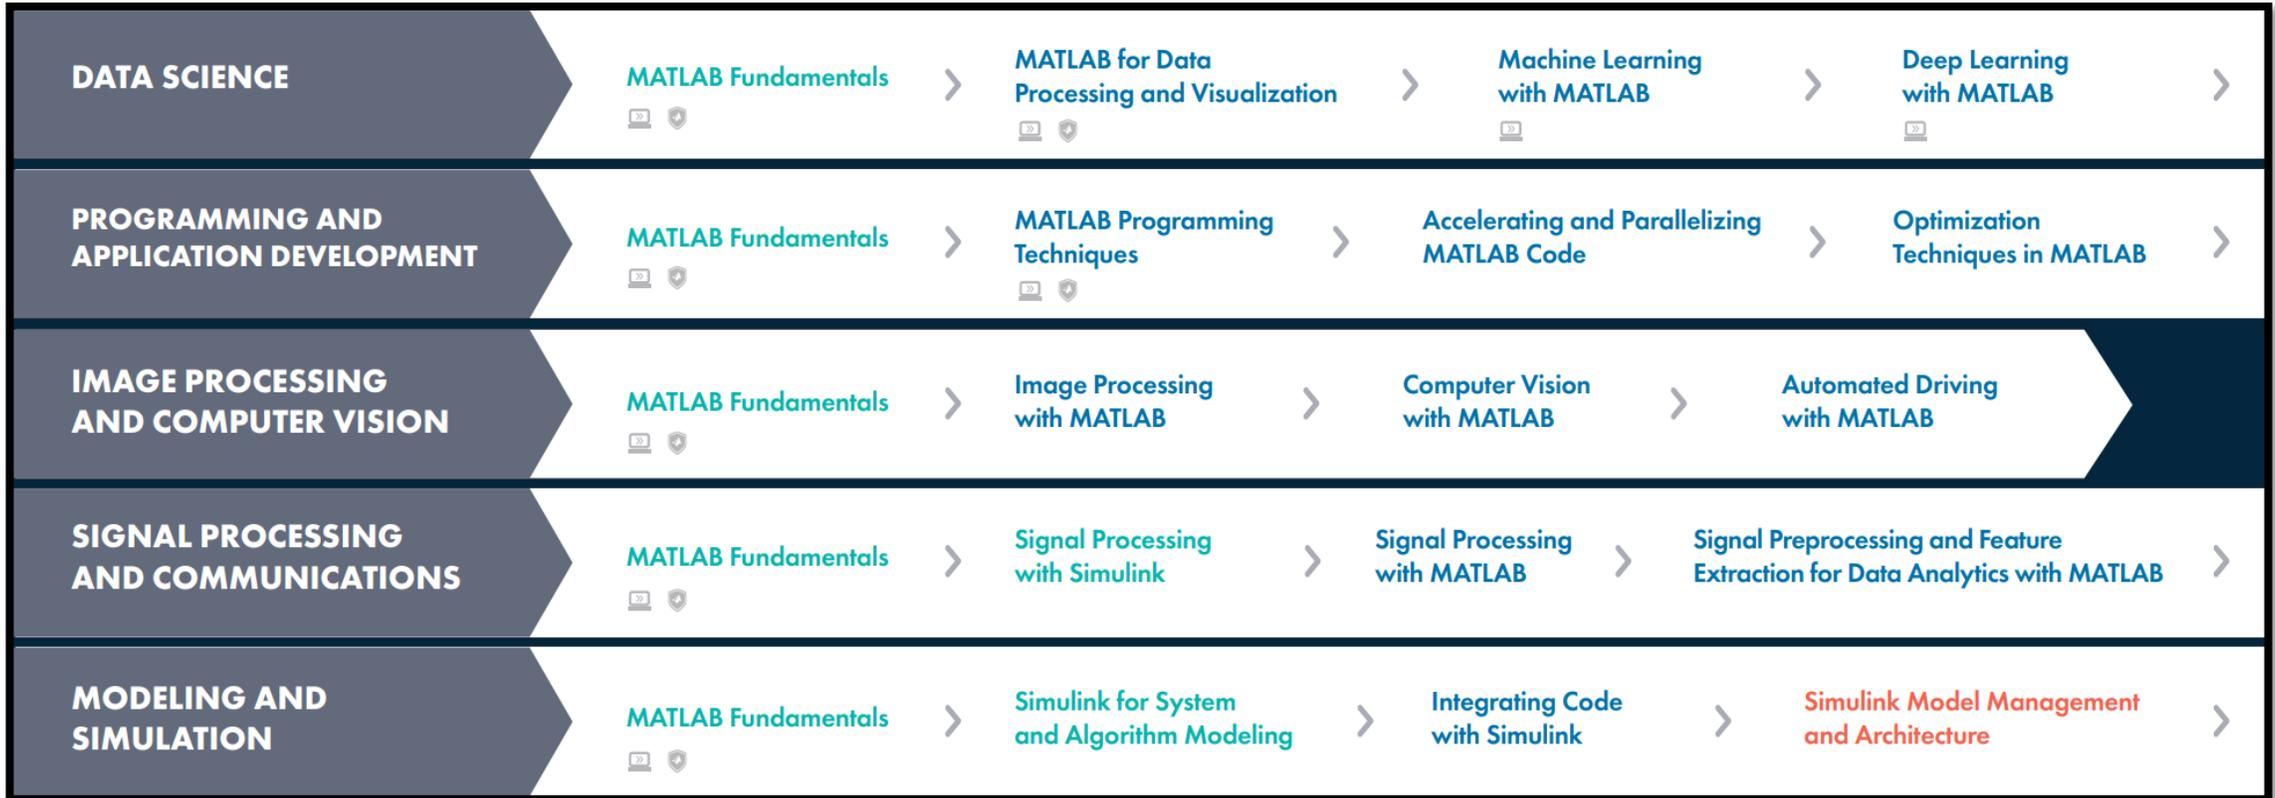

After this 2-day course you will be able to:

- Discover natural patterns in data
- Create predictive models
- Validate the predictions of a model
- Simplify and improve models

[See detailed course outline](#)

# Get Started on the Right Path

- [Find out more about Course Catalogue & Curriculum Path](#)

# Advance your skills with MATLAB and Simulink courses

Get started for free with MATLAB Onramp, then build your skills with our self-paced trainings and instructor-led courses.

## Flexible Training

- Over 50 courses available
- Virtual and in class offerings available
- Private customized events

## Proven Methods

- Hands-on instructions
- Use of Adult Learning Principles
- 95% rated real-world application to their jobs
- 104% average increase in productivity
- 144% average increase in competence

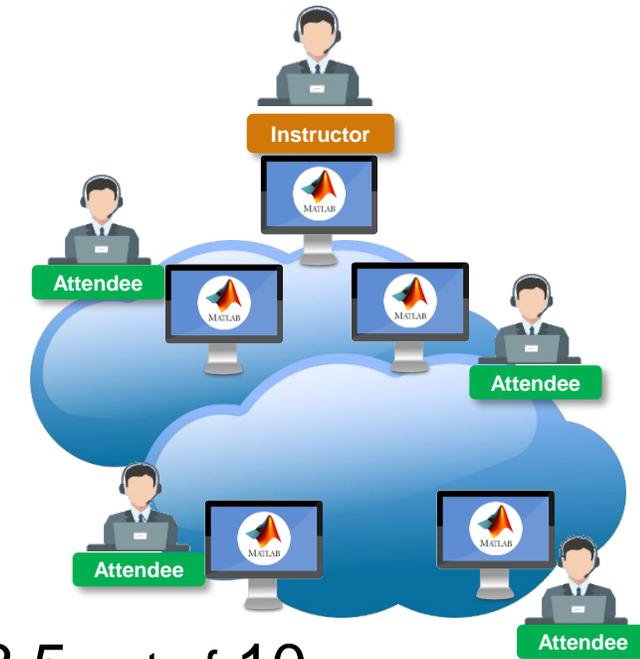

## Expert Trainers

- MS and PhD degrees
- Unparalleled products knowledge
- 98% rating as subject matter experts
- 96% of attendees recommend to others

# Take Your Training Virtually

- Attend training from anywhere
- Flexible class times with multiple time zones
- Virtual classroom provides interactive learning experience
- Preinstalled software on virtual machines
- Over 40 courses available
- Overall customer satisfaction similar to in class training of 8.5 out of 10
- [Get a brief taste of virtual training through a video](#)

“I attended two online trainings hosted by MathWorks. I was impressed with the virtual learning format. The instructor did an outstanding job presenting course material and facilitating attendee understanding.”
